#### 1. IDENTIFICATION

Product Name: All-Nutrient Powder Lightener

All-Nutrient Blue Powder Lightener

**Product Identification:** All-Nutrient® Powder Lightener

All-Nutrient® Blue Powder Lightener

Recommended use:

Bleaching powder for hair (for cosmetic use)

Restrictions on Use:

For professional use only

Manufacturer:

Chuckles, Inc. 11925 South Willow St

Manchester, NH 03103

**Emergency phone number:** 

(603) 669-4228

Transportation emergency:

(603) 669-4228

Product Type:

Powder

### 2. HAZARDS IDENTIFICATION

#### **Emergency Overview:**

This product is not expected to produce significant adverse health effects when the recommended instructions are followed.

# Classification of the substance or mixture:

2.1 This product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

2.1.1. Regulation 1272/2008 (CLP) and following amendments and adjustments

## Hazards classification and

21.12. 67/548/EEC and 1999/45/EC Directives and following ammendments and adjustments.

indication: Dar

Danger Symbols:

Skin sensitazation category 1 Xn

R phrases:

22-36/37/38-42/43

The full wording of the Risk (R) and Hazard (H) phrases is given in section 16 of this sheet.

Label elements:

Hazard labelling pursuant to EC Regulation 127/2008 (CLP) and subsequent amendments and supplements.

#### Hazard pictograms:

Signal words: Danger

**Hazard statements:** 

H272 May intensify fire; oxidizer. H302 Harmful if swallowed. H318 Causes serious eye damage. H315 Causes skin irritation.

H335 May cause respiratory irritation.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H 317 May cause an allergic skin reaction

**Precautionary statements:** 

P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking

P220 Keep/Store away from clothing and combustible materials.

P264 Wash thoroughly after handling.

P280 Wear protective gloves/eye protection/face protection.

P284 Wear respiratory protection.

P301+ P312 IF SWALLOW call a POISON CENTER or doctor if you feel unwell.

P304 + P340 IF INHALED remove victim to fresh air and keep at rest in a position comfortable for breathing.

Other hazards:

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0.1%

## 3. COMPOSITION / INFORMATION ON INGREDIENTS

Component	CAS Number
Sodium Silicate	1344-09-8
Ammonium Peroxydisulphate	7727-54-0
Dipotassium Peroxodisulphate	7727-21-1

#### 4. FIRST AID MEASURES

Remove contact lenses if present, wash immediately Flush with plenty of water for at least 15 minutes, **Eye Contact:** 

occasionally lifting the upper and lower eyelids. Get immediate medical attention.

Remove contaminated clothing. Rinse skin with shower immediately. Get medical advice/attention Skin contact:

immediately. Wash contaminated clothing before using again.

Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical Inhalation:

advice/attention immediately.

Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly Ingestion:

authorized by a doctor.

#### 5. FIRE-FIGHTING MEASURES

SUITABLE EXTINGUISHING EQUIPMENT **Extinguishing Media:** 

Extinguishing substances are: carbon dioxide and chemical powder. For product loss or leakage that has not caught fire, water spray can be used disperse flammable vapors and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water.

Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

Special hazards arising from the substance or mixture: HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

If large quantities of the product are involved in a fire, they can make it considerably worse. Do not breathe combustion

products.

Advice for firefighters:

GENERAL INFORMATION

In the case of fire, use jets of water to cool the containers to prevent the risk of explosions (product decomposition and excess pressure) and the development of substances potentially hazardous for health. Always wear full fire prevention

gear. Remove all containers containing the product from the fire, if it is safe to do so.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

#### 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: If there are no contraindications, spray powder with water to prevent the formation of dust. Avoid breathing vapors/mists/gases.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures

The product must not penetrate into the sewer system or come into contact with surface water or ground **Environmental precautions:** 

water

Methods and material for containment and cleaning up:

Use spark-proof mechanical equipment to collect the leaked product and place it in containers for recovery or disposal. If there are no contraindications, use jets of water to eliminate product residues.

Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of incompliance with the provisions set forth in point 13.

Reference to other sections: Any information on personal protection and disposal is given in sections 8 and 13

#### 7. HANDLING AND STORAGE

Precautions for safe handling: Ensure that there is an adequate earthing system for the equipment and personnel. Avoid contact with eyes and skin. Do not breathe powders, vapors or mists. Do not eat, drink or smoke during use. Wash hands after use. Avoid leakage of the product into the environment.

Conditions for safe storage, including any incompabilities: Store only in the original container. Store in a ventilated and dry place, far away from sources of ignition. Keep containers well sealed. Keep the product in clearly labelled containers. Avoid overheating. Avoid violent blows. Keep containers away from any incompatible materials, see section 10 for details.

Store in cool (below 30 °C) and dry areas. Avoid contamination and avoid the presence of reducing agents like lotions and permanent waves. Discard any unused mixture with developer or bleaching lotions, since the container may break. AVOID humid organic material as paper towel, wood, clothes, etc. which could induce spontaneous combustion. Protect from heat and sunlight; store in places far from rain and humidity; never store outdoors. Store separately from other dangerous and incompatible substances

Information not available Specific end use(s):

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### **Control parameters:**

Component	CAS-No.	Value	Control	Basis
			parameters	
Ammonium peroxydisulphate	7727-54-0	TWA	0.1 mg/m3	USA. ACGIH Threshold Limit Values (TLV)
	Remarks	Skin irritation varies		

**Exposure controls:** 

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure

that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

In the presence of risks of exposure to splashes or squirts during work, adequate mouth, nose and eye protection should

be used to prevent accidental absorption.

In the case of prolonged contact with the product, protect the hands with penetration-resistant work gloves. Hand protection:

Work glove material must be chosen according to the use process and the products that may form. Latex gloves

may cause sensitivity reactions.

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN Skin protection:

ISO 20344). Wash body with soap and water after removing protective clothing.

Wear a hood visor or protective visor combined with airtight goggles (see standard EN 166). Eye protection:

Use a type P filtering facemask (see standard EN 149) or equivalent device, whose class (1, 2 or 3) and effective need, Respiratory protection:

must be defined according to the outcome of risk assessment.

**Environmental exposure** controls:

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:

White: All-Nutrient® Powder Lightener Color

Blue: All-Nutrient® Blue Powder Lightener

characteristic Odor:

Not available. **Odor Threshold:**

Flammability/explosive limits:

## **Safety Data Sheet**

All-Nutrient® Powder Lighteners

Vapor Pressure: Not available.

Relative Density: Not available.

**Solubility:** Not available.

**Partition coefficient: n-octanol/water:** Not available.

Auto-ignition Temperature: Not available.

Decomposition Temperature: Not available.

Viscosity: Not available.

**Explosive properties:** Not available. **Oxidising properties:** Not available.

## 10. STABILITY AND REACTIVITY

Reactivity: Information not available.

**Chemical Stability:** Information not available.

Possibility of Hazardous Reactions:

This product may react violently with water.

Conditions to Avoid (e.g., static

Avoid overheating. Prevent moisture or water from penetrating inside the containers.

discharge, shock or vibration):

Incompatible Materials:

Information not available.

**Hazardous Decomposition** 

**Products:** 

Information not available.

#### 11. TOXICOLOGICAL INFORMATION

# Information on toxicological effects:

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product. Acute effects: ingestion of this product is harmful. Even small amounts of product may cause serious health problems (stomach pain, nausea, sickness, diarrhea).

This product may cause serious ocular lesions, cornea opacity, iris lesions, irreversible eye coloration. Acute effects: contact with skin may cause: irritation, erythema, edema, dryness and chapped skin. Ingestion may cause health disorders, including stomach pain and sting, nausea and sickness. Acute effects: inhalation of this product may irritate the lower and upper respiratory tract and cause cough and respiratory disorders; at higher concentrations it can also cause pulmonary edema. Ingestion may cause health problems, including stomach pain and sting, nausea and sickness. Inhalation of this product causes sensitization, which may then give rise to a series of inflammatory episodes, most of all characterized by obstruction and affecting the respiratory system. Sometimes, sensitization phenomena arise together with evident rhinitis and asthma. Damages to the respiratory system depend on the inhaled quantity, on the product concentration in the working environment and on the exposure time.

Upon contact with skin, this product causes sensitization (dermatitis). Dermatitis derives from skin irritation on the areas which repeatedly come into contact with the sensitizing agent. Cutaneous lesions may include: erythemas, edemas, papules, vesicles, pustules, scurvies, ulcerations and exudative phenomena, whose intensity varies according to illness seriousness and affected areas. Erythemas, edemas and exudative phenomena prevail during the acute phase. Scurfy skin, dryness, ulcerations and skin thickening prevail during the chronic phase.

## 12. ECOLOGICAL INFORMATION

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or sewers or contaminate soil or vegetation.

Toxicity: DIPOTASSIUM PEROXODISULPHATE

LC50 - for Fish.

> 76,3 mg/l/96h (trota iridea) EC50 - for Crustacea. > 120 mg/l/48h (daphnia) EC50 - for Algae / Aquatic Plants.

> 83,7 mg/l/72h (pseudokirchneriella subcapitata)

AMMONIUM PEROXYDISULPHATE

LC50 - for Fish.

76,3 mg/l/96h (trota iridea) EC50 - for Crustacea. 120 mg/l/48h (Daphnia magna) SODIUM SILICATE

LC50 - for Fish.

1108 mg/l/96h (Brachydanio rerio)

EC50 - for Crustacea.

1700 mg/l/48h (Daphnia magna)

**Persistence and degradability:** AMMONIUM PEROXYDISULPHATE

Solubility in water. > 10000 mg/l

Biodegradability: Information not available.

**Bioaccumulative potential:** Information not available

**Mobility in soil:** Information not available

Results of PBT and vPvB

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater

assessment: than 0,1%.

Other adverse effects Information not available

#### 13. DISPOSAL CONSIDERATIONS

Waste treatment methods: Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste

containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorized waste management firm, in compliance with national and

local regulations.

Contaminated packaging:

Contaminated packaging must be recovered or disposed of in compliance with national waste management

regulations.

**Waste residues information:** Not available.

Refer to section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees

## 14. TRANSPORT INFORMATION

Transport	UN Number	Class	Packaging Group	Label	Additional Information
Road/Railway (ADR/RID)	UN1479	5.1	III	5.1	
Marine Transport (IMO/IMDG)	UN1479	5.1	III	5.1	

#### 15. REGULATORY INFORMATION

**US Federal:** The product described in this Safety Data Sheet is regulated under the Federal Food Drug and Cosmetics

Act and is safe to use as per directions on the container, box or accompanying literature (where

applicable)

HCS Classification:

Toxic material Irritating material Target organ effects

U.S. Federal regulations:

TSCA: Exempt, not determined

SARA 313:

Ammonium peroxydisulphate

Clean Water Act (CWA) 311:

This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act

(40 CFR 122.21 and 40 CFR 122.42)

Clean Air Act (CAA) 112 regulated toxic substances:

Not listed

Clean Air Act Section 112(b) Hazardous Air Pollutants:

This product does not contain any substances regulated as air pollutants (HAPS) under section 112 of

the Clean Air Act Amendments of 1990.

**Clean Air Act Section 602** 

Not listed

**Class I Substances:** 

Not listed
