Disulfiram reactions (vomiting, headache and even collapse) may follow ingestion of small amounts of alcohol and have also been described from skin contact.

SECTION VII – SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Warning. Flammable. Eliminate all ignition sources. Handling equipment must be grounded to prevent sparking. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Clean area as appropriate since the silicone may present a slip hazard. Final cleaning may require use of steam, solvents or detergents. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur. Local, state and federal laws and regulations may apply to release and disposal of this material, as well as those materials and items employed in the cleanup of releases.

WASTE DISPOSAL METHOD: Do not contaminate food or feed by storage or disposal. Do not reuse empty container. Place empty container in trash collection. Dispose of according to federal, state, and local regulations regarding health, air, and water pollution.

SECTION VIII – SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (specify type): None required.
