COMPOSITION/INFORMATION ON INGREDIENTS

The compositions indicated correspond to the frame formulations for the category of products, as defined within Europe by an expert group composed of representatives from poison centres, competent authorities, industry trade associations and the Commission's services

The frame formulations indicate the types of ingredients and their maximum concentrations, to enable rapid identification of the products. The full list of ingredients is printed on the packaging of the individual products in accordance with the provisions of Article 19 of Regulation (EC) 1223/2009.

Ingredients	Maximum levels (% w/w)
Propellants (e.g. <i>dimethyl ether</i> , hydrocarbons)	95
Oils (e.g. vegetable and/or mineral), waxes and fats (e.g. long chain alcohols)	50
Silicones including volatile silicones (e.g. <i>cyclopentasiloxane</i> , <i>dimethicone</i> , <i>amodimethicone</i>), silanes (e.g. alcoxysilanes)	50
Liquid <i>paraffin</i> and isoparaffin (e.g. branched-chain isoparaffin (C11-C16), <i>isododecane</i> , <i>isohexadecane</i>)	40
Resins, polymers (e.g. <i>PVP/VA copolymer</i> , <i>VA/crotonates copolymer</i> , butyl ester of <i>PVM/MA copolymer</i>) / Neutralising agents (e.g. <i>aminomethyl propanol</i>) / Alkoxylated <i>glucose</i> derivatives	10
Additional ingredients (e.g. UV filters, vitamins, colorants)	5
Preservatives, antimicrobials	1
<i>Parfum</i>	1
Ethanol and/or isopropanol (alcohol, alcohol denat., isopropyl alcohol)	to 100

HAZARD IDENTIFICATION

When used in accordance with the manufacturer's instructions, the product is safe for humans and the environment.

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements).

DANGER

Warnings:

The directions for use are indicated on the products.

Product for professional use.

Extremely flammable aerosol.

Pressurized container: may burst if heated.

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Do not smoke.

Do not pierce or burn, even when empty.

Protect from sunlight. Do not expose to temperatures above 50°C (122°F).

Do not spray on an open flame or other ignition source.

Keep out of reach of children.

FIRST AID MEASURES

Contact with the eyes: remove contact lenses if present and rinse carefully with plenty of water; if irritation persists, seek medical advice.

Ingestion: if swallowed, contact the nearest Poison Centre or seek medical advice.

Contact with the skin: rinse skin immediately with plenty of water: if irritation persists, seek medical advice.

Inhalation: move the casualty outside, place them in a comfortable position where they can rest and breathe easily; if irritation of the upper respiratory tract persists, contact the nearest Poison Centre or seek medical advice.

FIRE-FIGHTING MEASURES

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

ACCIDENTAL RELEASE MEASURES

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

Do not disperse in the environment. Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired.

HANDLING AND STORAGE

Handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

Continuous exposure to cleaning agents (soap, shampoo, liquid detergents) for professional reasons may deplete the hydrolipidic film and horny layer which form the skin's natural barrier. The depletion of this barrier may result in lesions of the skin, which is then more exposed to external agents.

In such conditions, handling other products normally used during professional activities without the necessary precautions (e.g. gloves or specific PPE), may cause intolerance which, in the long term, may lead to more severe forms.

Storage

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

OCCUPATIONAL EXPOSURE CONTROLS

Respiratory protection: not needed for normal use. Avoid inhalation.

Hand protection: not needed for normal use.

Eye protection: not needed for normal use. Avoid contact.

Skin protection: use aprons, normal protective clothing.

ENVIRONMENTAL EXPOSURE CONTROLS

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Aerosol
Colour:	Colourless
Odour:	Characteristic

STABILITY AND REACTIVITY

The product is stable at room temperature.

DISPOSAL CONSIDERATIONS

Observe all local and state environmental regulations. Keep the product separated from other materials and dispose it chemically

REGULATORY INFORMATION

Regulated as Cosmetic Directive EU (Regulation (EC) No1223/2009/EC), Cosmetic and/or Drug under FDA (US), HPB (Canada). This product is safe to use as directed on the package.
