SECTION 4 – FIRST-AID MEASURES

Description of necessary first-aid measures	Inhalation:	Move affected person to fresh air.
	Skin:	Remove contaminated clothing and shoes. Wash with plenty of soap and water.
	Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Seek medical attention if irritation persists.
	Ingestion:	Do not ingest. Do not induce vomiting. Treat symptomatically. Never give anything by mouth to an unconscious person. Seek prompt medical attention.
	General Advice: If you have significant concerns please consult a physician, show this data sheet to the doctor in attendance.

Indication of immediate medical attention and special treatment needed if necessary	Not available	

SECTION 5 – FIRE-FIGHTING MEASURES

Suitable extinguishing media	Use alcohol-resistant foam, dry chemical or carbon dioxide. Do not use water spray.
Specific hazards arising from combustion products	May produce toxic fumes of carbon dioxide, carbon monoxide, nitrogen oxides, halogenated compounds and carbonyl halides from thermal decomposition.
Special actions for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SBCA) with a full face-piece operated in positive pressure mode. Use water spray to keep fire-exposed containers cool.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	For non-emergency personnel No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.
	For emergency responders Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SBCA) with a full face-piece operated in positive pressure mode.
Environmental precautions	Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for containment and clean up	For small spills: Use inert material to absorb liquid. Place waste in a chemical waste container.
	For large spills: Provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean area as appropriate since some silicone material, even in small quantities, may present a slip hazard. Final cleaning may require steam, solvents, or detergents. Observe all personal protection equipment recommendations described in Sections 5 and 8 of this SDS. Observe all Federal, Provincial and local regulations that may apply to the cleanup of this material. Sections 13 and 15 of this SDS provide information regarding any (if applicable) requirements.

SECTION 7 - HANDLING AND STORAGE

Precautions for safe handling	Protective Measures Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C / 122°F. Do not pierce or burn, even after use. Do not ingest. Avoid contact with eyes and clothing. Avoid breathing gas, vapor or mist. Use only with adequate ventilation (normal salon ventilation). Store and use away from heat, sparks, open flames or any other ignition source.
	Advice on general occupational hygiene Eating, drinking and smoking should be prohibited in work areas. Remove contaminated clothing and protective equipment before entering eating areas.
Conditions for safe storage, including any incompatibilities	Store upright away from direct sunlight in a dry, cool and well-ventilated area. Avoid flammability hazards such as potential ignition sources. Store upright and at room temperature in well-ventilated place. Do not expose to temperatures exceeding 50°C / 122°F.
