Section 4: First-Aid Measures

Suspected of damaging fertility or the unborn child

Emergency and First Aid Procedures

1- Skin: Discontinue use of product. Apply cold compresses to affected areas to relieve any discomfort. If discomfort persists, you should contact a physician.

2 - Eyes: Immediately flush with clean, lukewarm water (low pressure) occasionally lifting eyelids. Seek medical attention if irritation develops.

3 - Inhalation: If respiratory irritation occurs, remove individual to fresh air.

4 - Ingestion: Accidental ingestion of product may necessitate medical attention. In case of accidental ingestion dilute with fluids (milk or water). Do not induce vomiting.

Protection of first-aiders

First aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists

Section 5: Fire-Fighting Measures

Extinguishing Media: Use Carbon dioxide, Alcohol resistant foam, dry chemical, or water spray on small and/or large fires.

Unsuitable extinguishing media: High Volume water jet

Fire Fighting Procedures: Contact emergency personnel. Use self-contained breathing apparatus and full protective gear, if large quantities of product are involved. Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool.

Unusual Fire Fighting Procedures: None

Section 6: Accidental Release Measures

Methods for cleaning up: Remove possible ignition sources. Use appropriate personal protection equipment. Soak up with absorbent materials and wash with water; place in non-leaking containers for appropriate disposal. Determine if local, state and federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup process, and proceed accordingly.

Section 7: Handling and Storage

Use adequate ventilation. Avoid eye contact. Avoid skin contact.

Storage:

Store upright at room temperature. In order to maintain product quality do not store near heat source or in direct sunlight.

Other Precautions: Avoid bacterial contamination. Keep containers tightly closed when not in use.

Section 8: Exposure Controls/Personal Protection

OSHA Permissible Exposure Limits

Chemical Name	OSHA PEL	ACGIH TLV (TWA)
-	-	-

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

Respiratory Protection: Not applicable under normal conditions

Skin Protection:

Resistant Plastic or rubber gloves (optional). Wash at mealtime and end of shift is adequate.

Eye Protection:

Safety glasses or goggles. (optional)
